Toolpool is an agency that helps you coordinate the craftsmen you need for conversions, new building, extensions or refurbishment. This includes consulting, time planning and project management.

Toolpool is a service that advises on materials, colours and lighting schemes, as well as tracking down hard-to-find furniture and fittings.

Toolpool is a creative platform for decorative solutions and interior and furniture design.

Converting, extending or refitting apartments, renovating or refurbishing office space and shops or redecorating houses all take time. This is inevitably stressful and generally creates a lot of hassle.

We offer precise solutions to complex projects.
We love perfection and cleanliness at work.
We believe that good craftsmanship is not impossible.

Without experience, drawing up a reliable schedule for the work of carpenters, plumbers, electricians, tilers, painters and glaziers is a tough job. Finding craftsmen and negotiating schedules, costs and materials can take an eternity. And then you can only pray that they stick to the agreed schedule! Often delays can destroy the whole plan.

Toolpool is here to help you avoid this hassle.

We draw up precise schedules that detail the sequence of the work to be done, find the right craftsmen and recommend the best materials for the job. We can also put you in contact with reliable, creative architects. We supervise each phase of work until completion and ensure that a thorough final cleaning is done. With good planning, a conversion job can often be done over a single weekend.

If need be, we can find that elusive piece of furniture you have always been looking for—rare antique, designer or vintage pieces—wherever in the world it might be.

We also design unique interiors and supervise the manufacture of the furniture.
